This origami battle robot has a wedge tail, lateral ramming spikes and a front pecking spike. He runs on BALL POWER, and he's aiming to become the champion in the Paperweight Division!

A 10" square of matte gold foil will accommodate a 2½" diameter rubber ball.

- ① WSH; book-pinch twice to find center of paper.

- ② Cupboard-pinch four times.

- ③ Fold-unfold edge to far pinch. Repeat three times. Flip paper over.

- ⑤ F-UF, bisecting corner of little triangle. Repeat 7 times.

- ④ F-UF diagonals only as far as center square. Flip paper to white side.

Spikenard, p. 2

- 6 Enlarged view of one corner: F-UF edges of paper to the diagonal, as if a miniature Kite fold. Repeat with other three corners.

- 7 One more pre-crease and we're ready to collapse the model into shape. F-UF between the junctions of the creases from steps 5 and 6.

- 8 Holding adjacent folded edges snugly together, re-fold steps 6 and 7. Repeat all the way around.

- 9 Gather up each corner on the creases from steps 4 and 5, and pinch closed.

Spikenard, p.3

⑩

Flip model upside-down.

⑪

Holding at circle, IRF one spike so corner X lies along middle of flap.

⑫

Detail: Narrow; repeat on hind layer.

⑬

M+F remaining corner inside.

⑭

Note spike sticks up at an angle. Now work on spike in opposite corner.

⑮

IRF so flap is more horizontal. (X will lie at middle of flap.)

Spikenard, p. 4

SPIKENARD

To activate him, place a rubber ball inside + roll them around on a tray.
