

MOMMY HEART & BABY HEART

Start with a 6" ($5\frac{7}{8}$ ") square of duo-color paper. (Kami is okay - one heart will be white.) Decide which color you want to be the mommy heart and begin with that side up. Note: use a ruler to measure accurately in steps 2 and 12.

- (6) Squash-fold so the mt. lies along the vertical. Repeat on right to match. * is pre-crease.

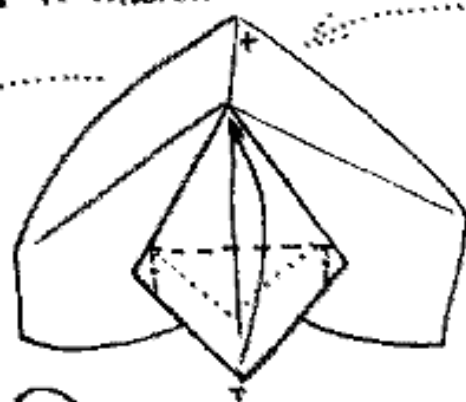

- (7) Flip model over.

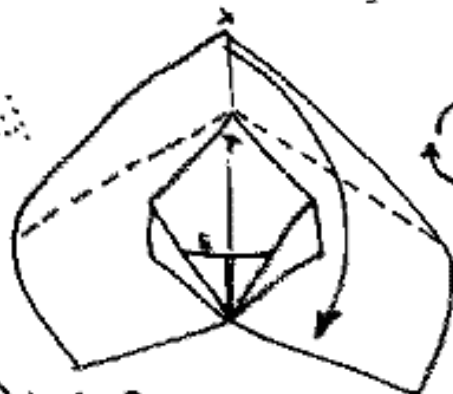

- (8) Lift near layer. Note corner X.

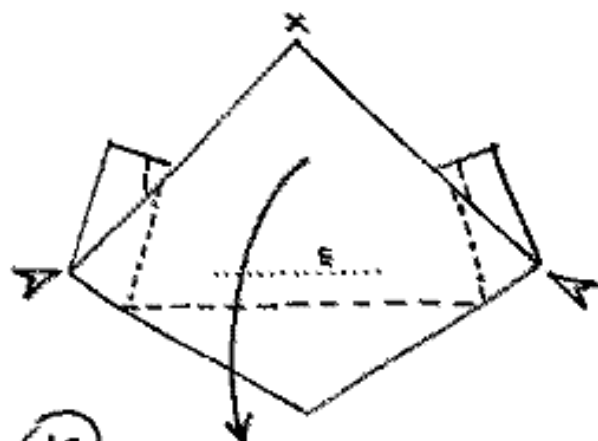

- (10) The tension will pull the sides up. Flatten in a kind of petal fold (on step 9's dotted line.)

- (9) View inside. On step 3a's pre-crease, VF T to innermost corner.

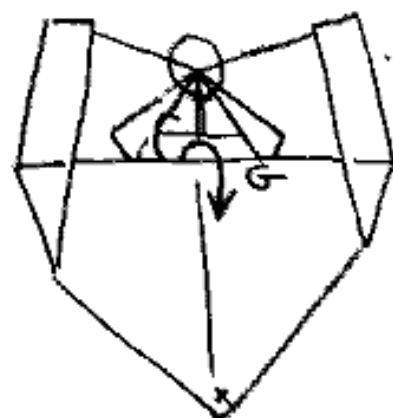

- (11) Note folded edge E. Bring corner X back down. Tilt model 180°.

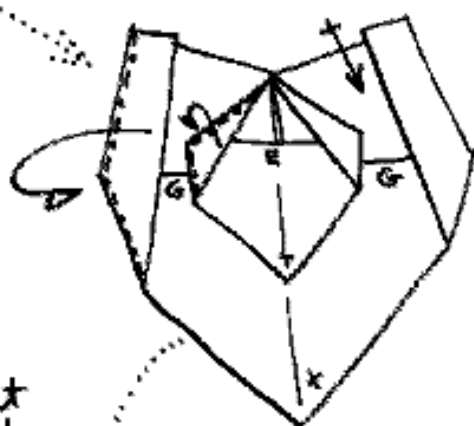

- (12) VF near flap down $\frac{5}{16}$ " below edge E; membrane-fold sides.

- 13 Holding down at circle, carefully pull out inner flap T, over edge G.

- 14 Carefully turn the near left layers inside out: large flap first then small one on that side. Partially unfold the model and invert the edges into mountains. Flatten. Repeat on the right. If the model has been folded accurately, the soon-to-be baby heart will lock around the edge G and lie flat without tearing.

- 15 M+F; Repeat on right to match

- 16 M+F; Repeat on right to match.
