

MUHINDI (The Corn)

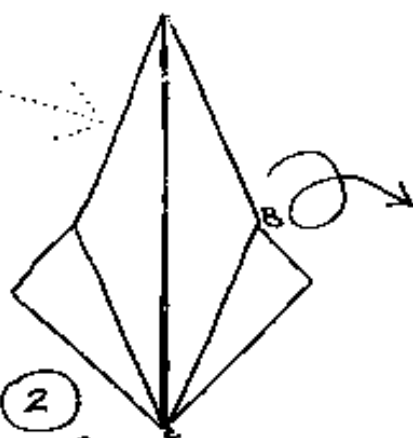

a symbol of Kwanzaa

Use a 6" square of duo-color paper in green and yellow. Or use green kami. The corn will be the inner color and the husks green. Start with a preliminary fold, green side out.

① Petal-fold near side.

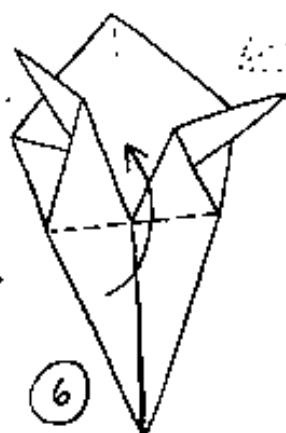

② Note folded edge BC. Flip model over, left to right.

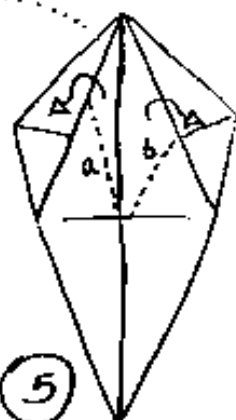

③ IRF so that spine AB aligns with BC. The dotted line marks both the VF and the underlying edge from step 2. Repeat on right.

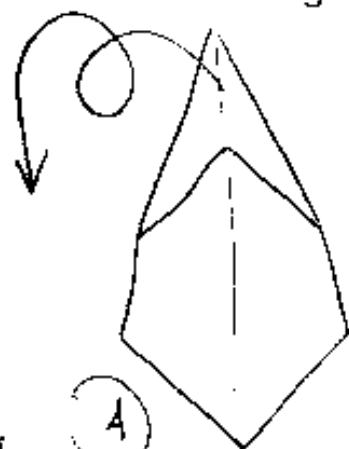

④ MF

⑤ VF lower flap up.

⑥ Fold two IRFs but note different angles. (Pre-crease first, if desired, to place folds.)

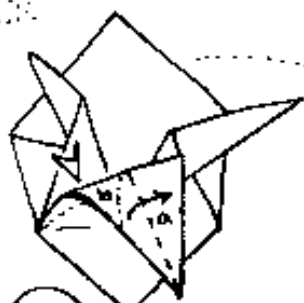

⑦ Flip model over top to bottom.

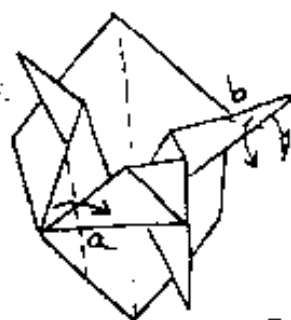

Muhindi, p. 2

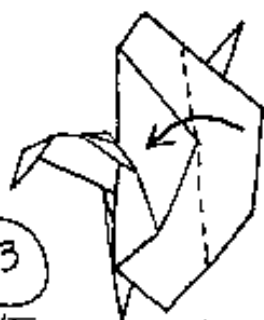

8 VF only to middle of flap.

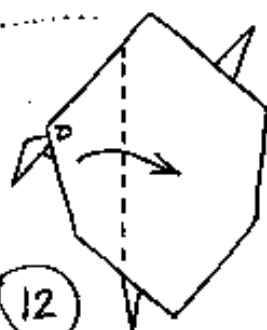

9 VF down the middle of the flap (a) and (b) squash-fold.

10 a) VF near layer. b) ORF tip.

11 VF on right to match step 12's taper.

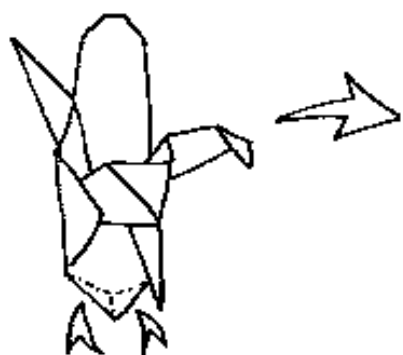

12 VF - corner D goes past middle of model and a small membrane fold develops on underlying flap. Flatten it.

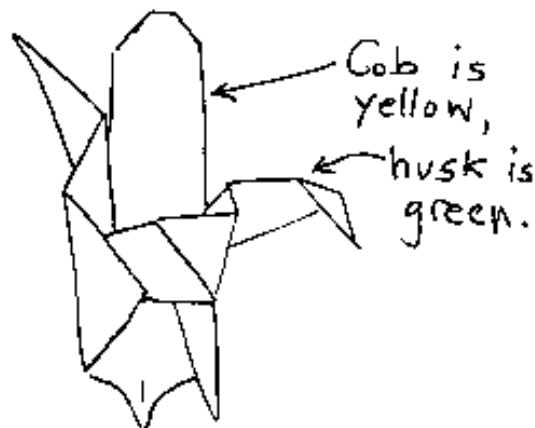

13 Flip model over left to right.

14 VF top tip and flip model over.

15 Pinch bottom tip in a casual rabbit ear.

Cob is yellow, husk is green.
