Start with a
fish base,
mt. folded in
half.

- ① Hinge-fold small flap (back and forth.) Repeat behind.

- ② Fold peak down, parallel with bottom edge. Repeat behind, matching up new edges. Unfold.

- ④ Pull down flap on the crease made in step 2.

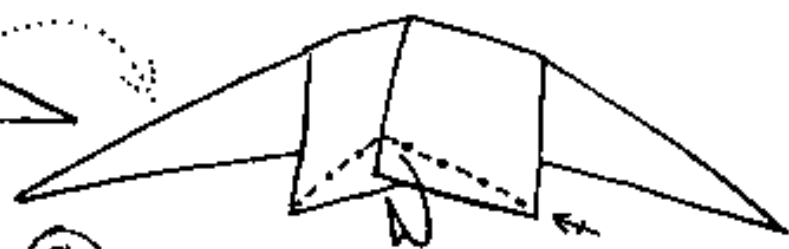

- ③ Lift small flap and open it.

- ⑤ Crimp sides almost but not quite to vertical.
Repeat steps 3-5 on back

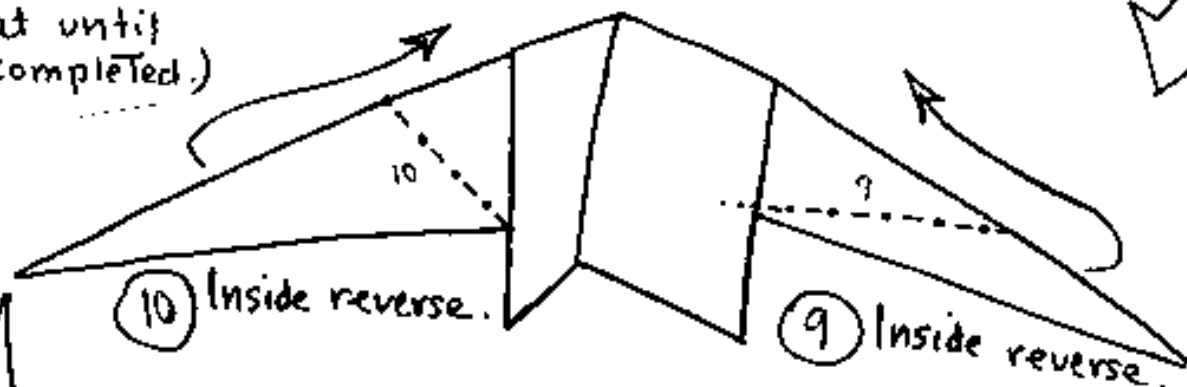

- ⑥ Fold tip of flap up into model. Rb.

- ⑦ Holding top (colored) layer and inner (white) layer together, radial-pleat. Repeat behind: these two moves form a crimp. (Model will not lie flat until crimp is completed.)

- ⑧ Make a "membrane" fold. (On inside, narrow and squash.) Repeat behind.

- ⑨ Inside reverse.

- ⑩ Inside reverse.

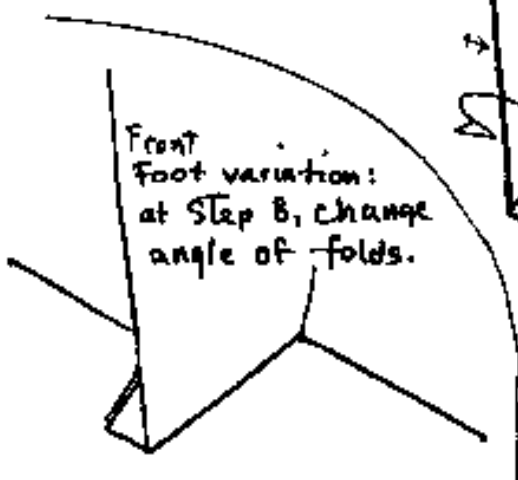

- ⑪ Inside reverse left flap. (enl. detail)

- ⑫ Crimp with 2 ORFs.

- ⑬ result

Front Foot variation:
at Step 8, change
angle of folds.

- ⑭ OPTIONAL: narrow neck, if desired.
