

Start with the
Crane Base

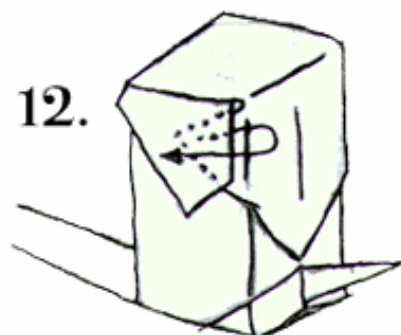

Inside Reverse fold

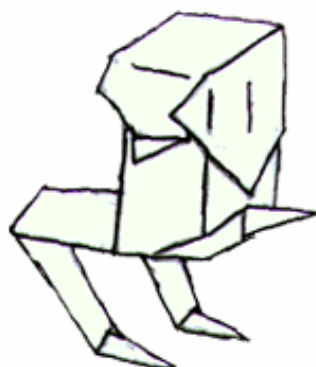

Fold A down to form
a top to the Box, Pull
B and C out and then
down against the
sides.

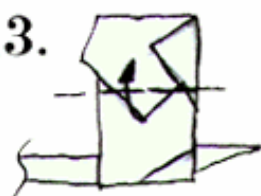

12.

Unfold hidden flap
and Refold on the
outside

13.

Fold the little
flap up 90°
(perpendicular to
body)

It's very unstable,
but if you make the feet
large enough, it will stand.

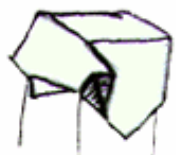

14.

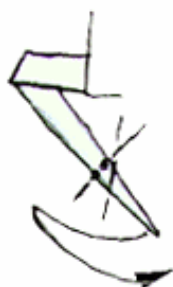

Extra Credit: If you start with a dark color
on the inside, you can make
the 'eye-like' windows

Slide the single top
layer, revealing the reverse color

15.

Form the feet.
Repeat steps for left
side of body
