

Bottle and Stand

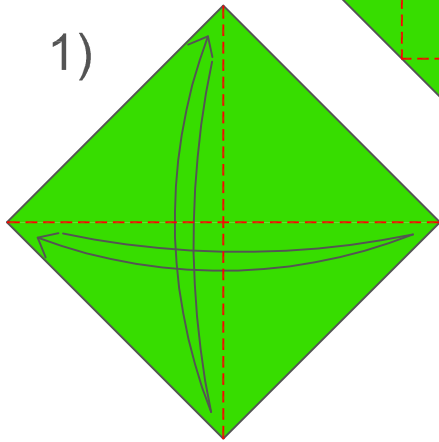

2)

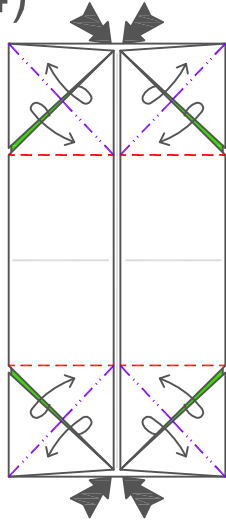

3)

1)

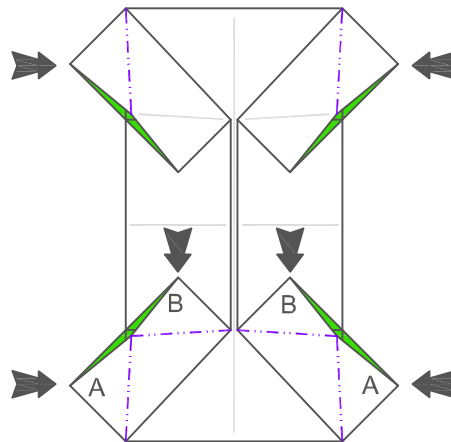

4)

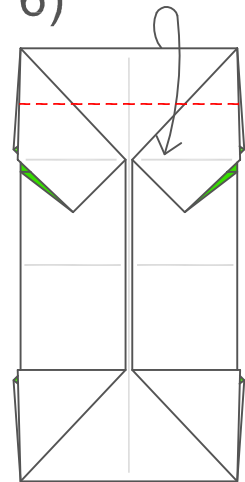

Open flaps out and squash down

5)

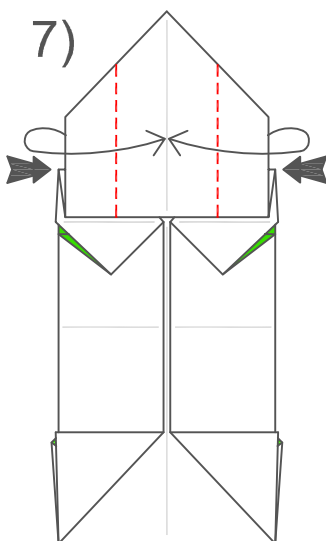

Tuck flap A behind model. Don't tuck them in to the small rectangle on the front of the model. Tuck flap B into the small rectangle on the front of the model.

6)

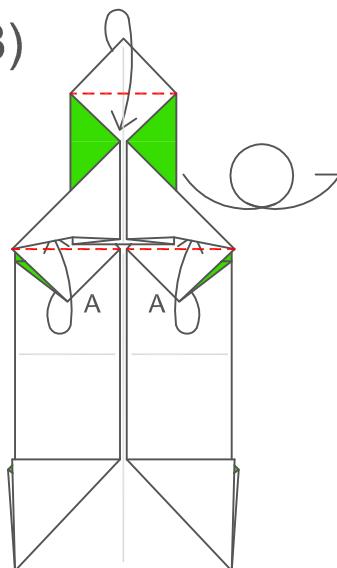

Fold flap over ensuring that the triangular flap at the back of the model is allowed to pop up into position shown in next diagram

7)

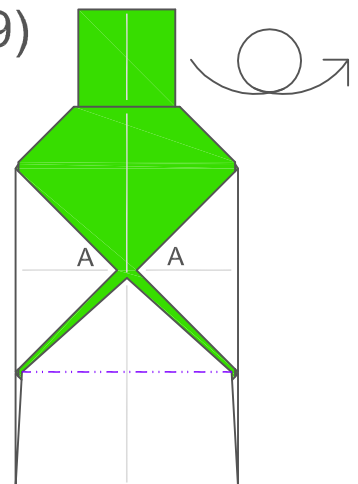

Fold flap over to the centre. As you do this the flap behind will automatically squash flat.

8)

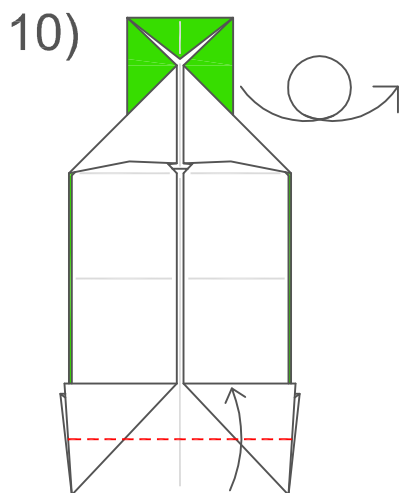

Tuck flap A up into the small triangular flap, thereby locking them into place.

9)

Tuck flap A into the model. You will need to open the model out slightly to do this.

Bottle and Stand (cont)

Fold front part of model thru 90° so that it forms a stand for the bottle
