

# Yacht

1

Fold in half.

2

Crease through both layers, but only on the top half of the paper.

3

4

5

6

Mountain fold behind, a little lower than where the diagonal crease meets the edge (this distance will be the height of the mast).

7

Crease the diagonals to the centre. Only crease through the top 2 layers.

8

Unfold the top and bottom.

9

10

10a

This shows the halfway position.

10b

11

12

Collapse. This is similar to step 10.

13

Unfold everything!

# Yacht

14

15

Fold in half while collapsing the middle section on the creases indicated.

16

Unfold to step 15 but do not flatten.

17

Make 4 open sinks.

18

Fold in half while collapsing the 2 sections (just like in step 15).

19

Unfold again, but do not flatten.

20

For the next few steps only the circled area is shown.

21

Fold and stretch.

22

Valley fold.

23

Fold back again while collapsing on the existing creases.

24

25

Repeat steps 21-23 on the other side.

# Yacht

26

Fold in half and flatten.

27

Valley fold both layers up.

28

Crease through all layers.

29

Inside reverse fold.

30

Wrap a single layer behind. To do this easily, you need to unfold the model slightly.

31

Squash fold.

32

Valley fold and tuck behind all the other layers.

33

Valley fold the corner and tuck behind to lock.

34

Crease all layers.

35

Valley fold inside.

38

Mountain fold the inner layers to lock.

36

Inside reverse fold the front only.

37

If you round the base of the model it will stand up.
