

Naboo Starfighter

Form the preliminary base.
Arrange it so the open corner is up.

Petal fold

Fold corners to
the center line

Inside Reverse fold tips. . .

. . . so that circled lines are
perpendicular to the center line.
Turn over

9

10

Inside reverse fold

11

Inside reverse fold

12

Inside reverse fold again

13

Repeat steps 10 - 12 on left side

14

Lightly fold. Don't crease hard or paper at nose will rip.
This is just giving the cockpit shape, like this:

15

Now fold only the tail section.
Pinch it flat. . .

. . .like so

And you're finished. I like the implied cockpit and the little R2 unit sticking up out of the top.

I made one with silver foil paper, with the reverse side painted yellow, and it looks rather slick, if I say so myself.
