

Star Destroyer

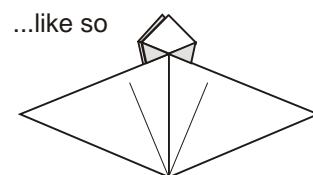

Crease along the diagonals and then fold in half with the colored side inside.

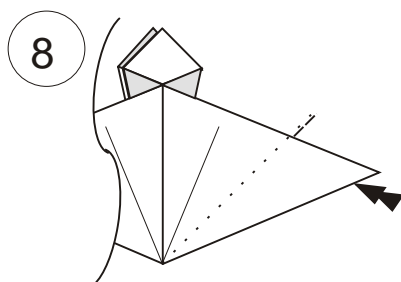

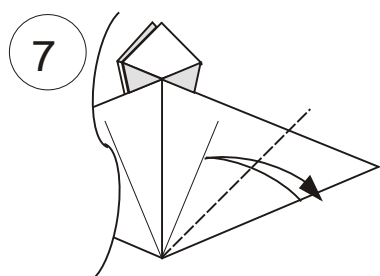

Pleat along existing creases

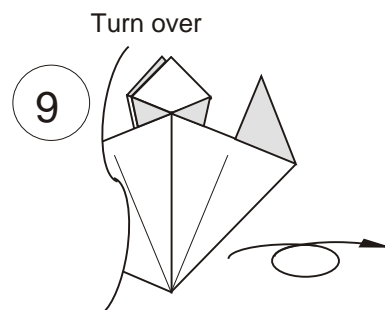

Separate the two layers...

...like so

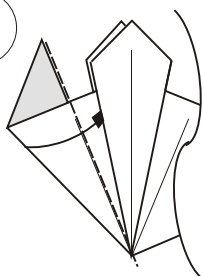

Inside reverse fold

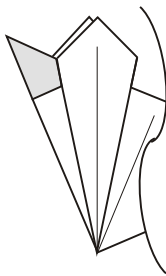

Turn over

10

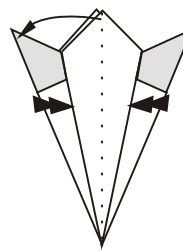

Valley fold and tuck
under flap

11

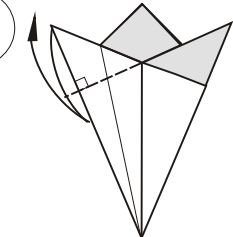

Repeat steps 7-10 on
other side

12

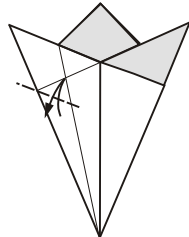

Unflatten the center peak
by squeezing the sides and
then fold to the left

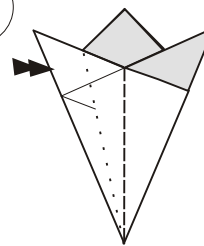

13

14

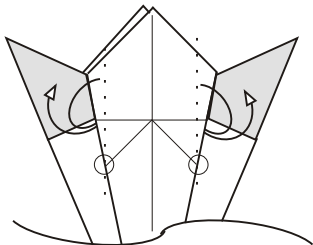

15

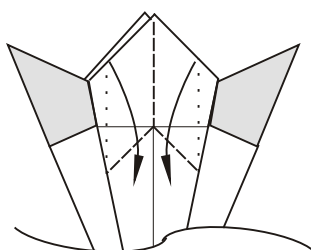

Squash fold the flap flat.
This is undoing step 12

16

Mountain crease top flap
parallel to the centerline, so
they touch the diagonal
creases

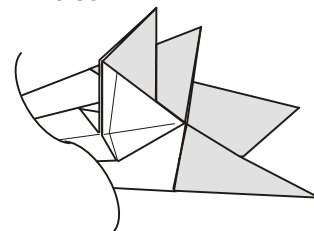

17

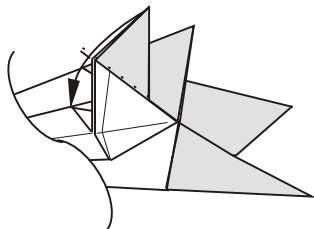

Rabbit ear flap toward you.
Slide the sides to the
parallel creases you just
made...

...like so

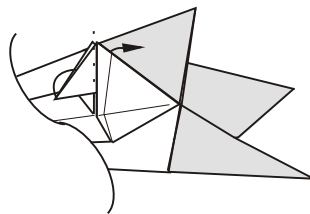

18

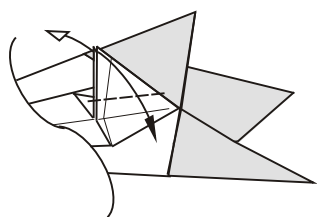

Inside reverse fold

19

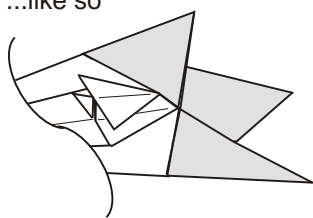

Inside reverse fold

20

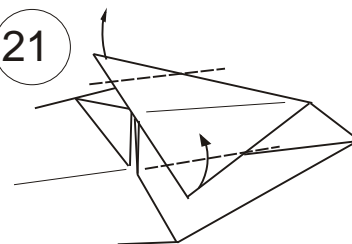

Fold out flaps, making the bridge...

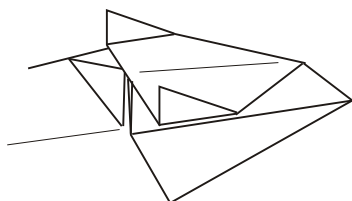

...like so

21

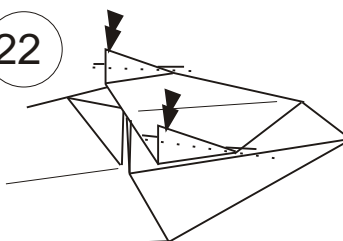

Valley fold up 90 degrees

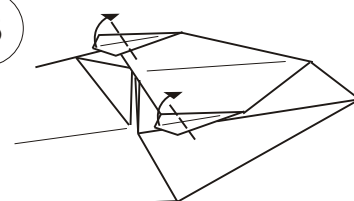

If the model is too small for details, you can skip to step 24

22

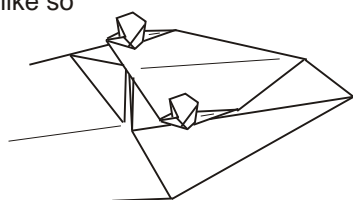

Squash fold each flap down, spreading the inside edges

23

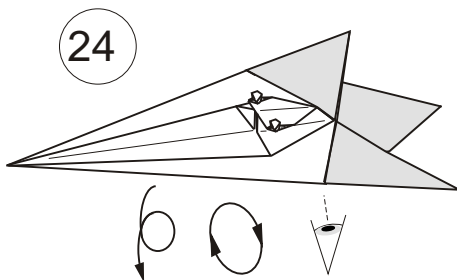

Fold each flap up, squashing the inside edges...

...like so

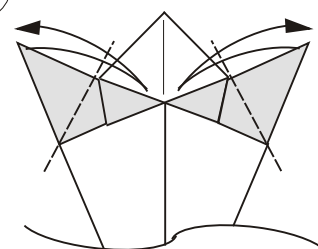

24

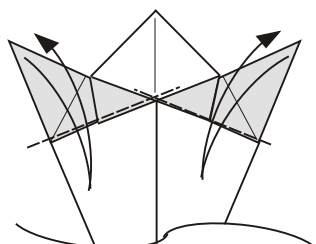

Turn over so you are looking at the bottom of the model

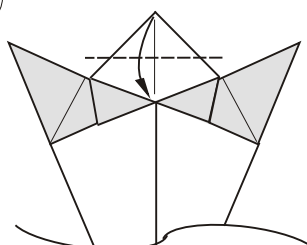

25

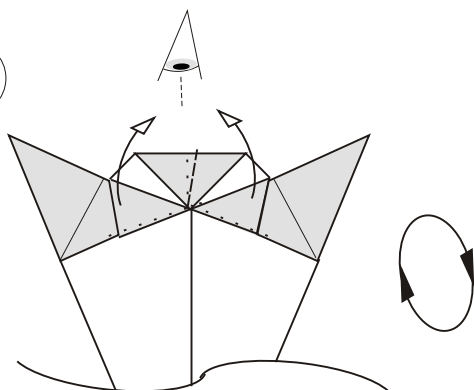

26

27

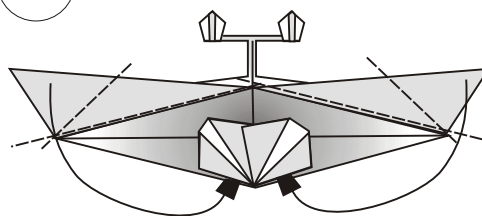

28

Mountain fold the middle flap back 90 degrees into the inside of the model. You will have to open up the model.

Pleating the flap will give the model a 3D shape

29

You are looking into the back of the model. Tuck the side flaps in the pocket under the middle flap to lock the shape.

You can adjust the 3D shape of the ship by changing the angle of the pleat in step 28 and the creases in step 25
