

AT-AT Imperial Walker

13

Repeat behind

14

Tuck flap inside body.
Repeat behind

15

Inside reverse fold

16

17

Petal fold along existing crease.
Tuck flap inside the body

18

19

20

21

22

23

Unfold the flap

24

25

Collapse along existing
creases

26

Petal fold

27

Fold the large flap down
and out while folding one
flap to the right

28

29

30

Thin the top layer only with
an inside reverse fold

31

32

Fold two flaps to the right

33

Repeat steps 28 to 30

34

Crease very hard.
There's no reference point;
wherever looks good

35

Crease very hard,
reversing previous crease

36

Sink the back. (sorry)
Closed sink is better, but an
open sink is easier.

Alternatively, just unfold a
flap from step 14 and trap
the back behind it

37

38

Squash fold upwards

39 Side view:

Fold the flap down while opening up the sides, like a reverse-petal fold

40

41

Lift the bottom and narrow the head to make it 3-D. Additional adjustment may be necessary

...like so.

42

Repeat steps 38 to 40 on each of the feet.

Note that despite the differing layers, the leg layers each have a general M shape. The first squash would be toward the top of the 'M'

Getting all four legs even can be tricky. Why not try putting one leg up as if it were walking. Or about to crush a hapless snowspeeder?
