Repeat steps 2 to 6 on back side

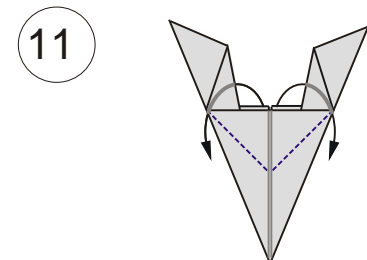

Petal fold top edge down while sides fold in

Tuck flap inside model

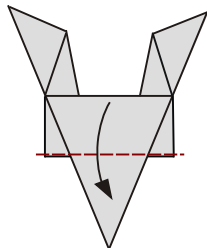

Repeat steps 7 to 9 on the other three sides

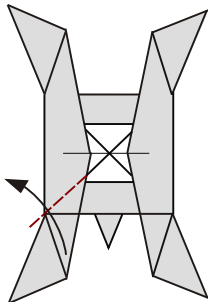

Inside reverse fold the middle flaps down 90 degrees

12

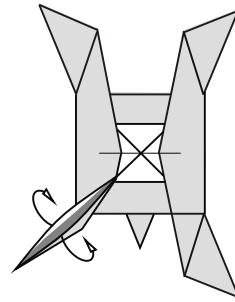

13

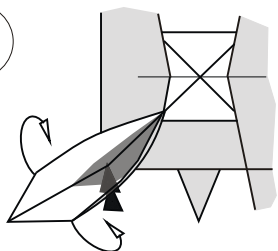

Fold flap up 90 degrees

14

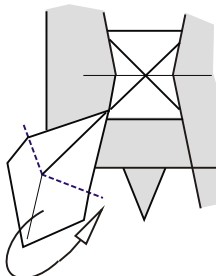

Invert the flap by opening up the sides...

15

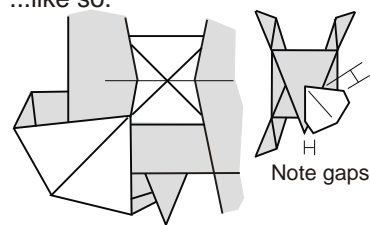

...and pushing on the bottom of the 'bowl'...

16

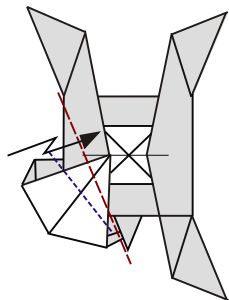

...mountain fold the tip behind, while flattening the creases...

...like so.

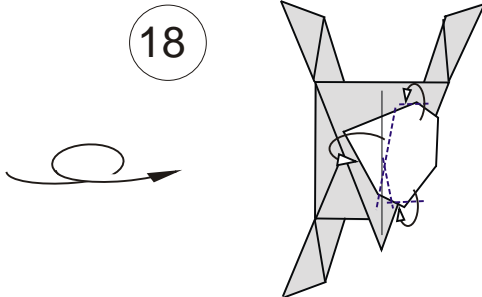

Note gaps

17

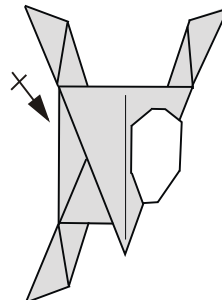

Pleat so the new flap is tight against the head.
Turn over model.

18

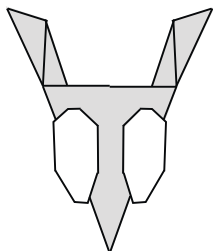

Mountain fold to round out eye

19

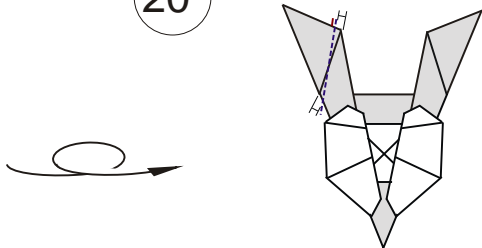

Repeat steps 13 to 18 on other side...

...like so.

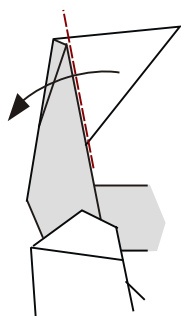

(Crushing him under a mighty human word book may teach him proper obsequence)

20

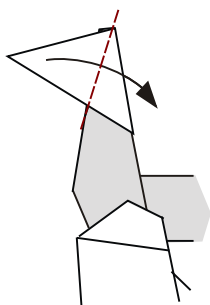

Inside reverse fold, not on corners

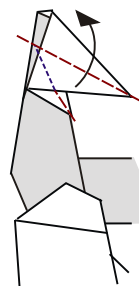

21

22

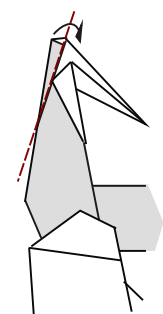

23

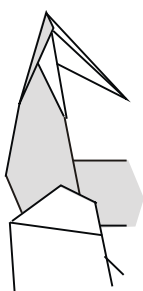

Swivel fold to narrow
the antenna

24

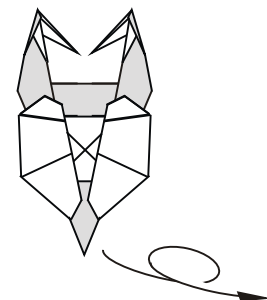

If the top is not pointy,
valley fold

25

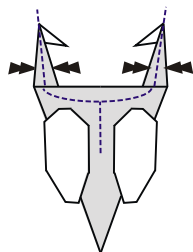

Repeat steps 20 to 24
on other side...

...like so.

26

Thin the antennae by
pinching the flaps and
shaping the head.
